PROFILE

An innovative full-stack web developer who specialises in Ruby on Rails, JavaScript and TypeScript. Very passionate about building scalable, user-friendly web apps with a strong focus on optimising performance and intuitive UI. I thrive in agile methodologies, collaborative with teams using Ruby on Rails, Stimulus, PostgreSQL and Git to develop clean, maintainable code.

PROJECTS

Morning Burrito

03/2025 – 04/2025

Developed a scalable mobile app using Ruby on Rails and JavaScript Stimulus to inspire user creativity by completing daily creative challenges. Collaborating in a 5-member agile team, using PostgreSQL for robust data handling whilst, integrating Cloudinary for efficient media management.

Blue Horizon

02/2025 – 02/2025

Developed a web app using Ruby on Rails with an Airbnb framework to bring travel enthusiasts to yacht rental services. Collaborated in a 5-member agile team while leveraging PostgreSQL for robust data handling and integrating Cloudinary for efficient media management. Utilised Bootstrap to create and develop a scalable, responsive web app for user experience and to set a foundation for further future enhancement.

EDUCATION

Web Development

Le Wagon

10/2024 – 04/2025

- 7 month part-time intensive bootcamp
- Learned and use of Ruby on Rails, JavaScript, HTML/CSS, SQL, Git, Agile Methodologies
- Engaging in hands-on real-world coding challenges and web development
- Focusing on object-oriented programming (OOP), database design, and web technologies
- Designed, implement and shipped production a clone of airbnb (Blue Horizon)
- Pitched the idea of yacht rental and completed the project in 2 weeks

BSc Sports & Exercise Science

University of Hertfordshire

10/2015 – 05/2019

Bachelor of Science in Sports and Exercise Science (2:1)

Key Skills: Data analysis, research methodology, problem-solving, project management.

PROFESSIONAL EXPERIENCE

Occupational Health Technician

Gatwick Airport

12/2022 – present

- Coordinated weekly data reviews and used our internal database tools to keep patient records accurate and up to date.
- This role really helped me sharpen my attention to detail and strengthen my system analysis skills.
- Improved workflow by troubleshooting the software we used to track health data. This provided an insight about debugging and refining technical processes.

Occupational Health Technician

Express Medical

10/2020 – 12/2022

- I provided technical IT support by installing and troubleshooting software applications.
- I kept digital records and updated databases to ensure the data was accurate and reliable, similar to practices used in the backend development.
- I aided in automating workflows on the eOPAS support desk managed ticketing. This experience helped me understand the software support processes and agile task management.

SKILLS

Ruby on Rails | TypeScript | Ruby |
C++ | JavaScript (node.js Webpack) |
CSS | HTML | SQL/PostgreSQL |
Data Analysis | IT Support |
Project Management | Git | Github |
Heroku | Cloudinary

INTERESTS

- Coding
- Biomechanics
- Psychology
- Anime and Manga

LANGUAGES

English(Native) | Twi

Occupational Health Technician

Duradiamond Healthcare

09/2019 – 10/2020

- Managing digital records and checking data quality to keep our records consistent. This helped strengthen my data handling skills.
- Completing health screening processes and looking out to catch data issues early. This experience is useful and can translate to debugging.

Teaching Assistant

Lilian Baylis Technology School

12/2018 – 09/2019

- I simplified and explained complex concepts to students. This helped me to breakdown technical ideas-useful for documenting code.
- I led small group study sessions and developed lesson plans. This built my skills in planning projects and organising resources like working in agile software projects.

IT Support Analyst

Delaware North Company

09/2017 – 09/2019

- Provided first-line technical support by troubleshooting software and hardware issues, providing experience in a solid foundation for systematic debugging and problem-solving.
- I managed user accounts and handled system integrations, giving me practical experience with technical systems. This provides similar background to managing code and ensuring compatibility in software development.
- I supported critical operational processes during match days, which taught me the importance of reliability and quick responses, especially in high-pressure technical environments.
